Wentzel Electric Has Been Family Owned & Operated for over 43 years!

NEW CONSTRUCTION

Wentzel Electric has worked with several builders to provide quality electrical services. Our electricians are trained to the highest standards of excellence through a rigorous five-year apprenticeship program.

Because of our affiliation with NECA-IBEW, our builders have an additional warranty, known as +5 Homeowner's Electrical Protection Plan. To learn more, please visit **Plus 5** <http://www.electricalconnection.org/ElectricalProtection.cfm>

Warranty program extends the homebuilder's warranty for an additional five years.

SERVICE UPGRADE

Service size requirements for your home will depend on a number of different things. The more electrical fixtures, appliances, (stoves, ovens, water heaters, dryers), etc that you have in your home will increase the demand from your panel.

Saunas, spas, and workshops also draw large amounts of electricity. If many of the above mentioned items are working simultaneously; the electrical service may be inadequate causing the main breaker to trip. This happens when the flow of current exceeds the safe capacity allotted.

Wentzel Electric can perform an inspection to determine whether or not a service upgrade will benefit you depending on your future plans of growth and your current electrical capacity.

DESIGN BUILD

Whether you are adding light to a dark corner, creating attention to that perfect piece of art, or completely remodeling your home, Wentzel Electric can provide the dramatic affects you are looking for. Let our team design your next project. With fair pricing, a professional staff, and our outstanding attention to detail, how can you go wrong?

SCHEDULING

Wentzel Electrical is adept at planning and scheduling labor and material for simultaneous projects. Trust us to identify appropriate milestones, develop an appropriate calendar, then adhere to it in an effort to complete your job on time - and on budget.

BUDGETING

Our experience in a variety of environments enables us to make accurate budgets for materials, labor hours and direct job expenses. Our budgeting and value engineering software gives us the power to create detailed cost breakdowns for jobs of any size.

GENERATOR INSTALLATION

How long was your power out? Wentzel Electric offers several options to prevent the headaches that a power failure can bring. We offer digital portable power for an inexpensive way to keep the necessary items powered for a short power outage.

Wentzel Electric can also customize a stand by generator to suit your homes needs in a power outage.
